(UGC-AUTONOMOUS INSTITUTION)

Madanapalle-517325., Annamayya Dist., Andhra Pradesh

## MITS-INTRA-HACKATHON-2022

In the modern business world, there is a constant push to develop innovative ideas that transform our lives. The problem, however, is that everyone thinks their idea is pioneering, making it even harder to achieve true innovation. If you think you are on the cusp of the next “disrupting” business, product, or service, ask yourself these questions to determine whether your idea is innovative. The prime requirement for an idea to be innovative is its originality. Moreover, that does not mean improving an existing idea by adding flavor. It means coming up with a unique idea that introduces a new way of thinking to the market. For an idea to be innovative, it must be doable. As such, coming up with the idea is only half the battle. Your idea might seem groundbreaking on the surface and could even improve people’s lives. However, it is also essential to consider whether it will harm something else, such as the environment. If your idea makes things easier for people but will destroy something else along the way, it is neither innovative, nor sustainable, for that matter. It is not genuinely innovative if you cannot figure out how to make your idea a reality. MITS Innovation Cell is going to organize an Intra-Institutional Idea competition called MITS-INTRA-HACKATHON-2022 on November 30, 2022. The selected students should present their ideas.

### Prizes

**First Prize: Rs 3000**

**Second Prize: Rs 2000**

**Third Prize: Rs 1000**

### REGISTRATION DETAILS:

Participants: Students from all department  
Last date for applying: 28 November 2022  
Acceptance notification: 29 November 2022  
Competition: 30 November 2022  
“No Registration Fees”
