

Design Thinking Studio (DTS) Policy

- To establish a quality system to foster the culture of innovation and entrepreneurship, along with social responsibility among the students.
- To instil the Design Thinking principles among the students.

1. Role of Management

- The management on its part will provide a conducive environment to communicate and establish DT principles among the students
- The management will provide infrastructure and other requirements to conduct design thinking workshops in the campus.
- The management will also provide some seed money for motivating the students to prepare the prototypes.

2. Role of Faculty

- The team of Faculty Innovation Fellows & University Innovation Fellows will conduct design thinking workshops to monitor the progress of students.
- The faculty should also motivate and encourage the students to take part in the workshops to motivate them towards innovations & entrepreneurial activities.

3. Role of students

- Students would use the infrastructure facilities and equipment to maximise their learning capabilities to align their mind set towards the innovations.
- The students would act as ambassadors for promoting the DT culture at MITS, not only among the current students but also the prospective students and outreach the schools around.
