Head-Entrepreneurship Development Cell
Madanapalle Institute of Technology & Science

Recruitment and selection are the two phases of the employment process. The recruitment is the process of searching the candidates for employment and stimulating them to apply for jobs in the organisation whereas selection involves the series of steps by which the candidates are screened for choosing the most suitable persons for vacant posts. Training has now become

important in every field be it Sales, Marketing, Human Resource, Logistics, Engineering, Production and Manufacturing, Inventory Management etc. Indian companies fulfill their requirement of skilled workforce by providing on-the-job trainings and other internal educational programs which are designed to quickly improve the expertise of new recruits especially in the high-tech industry.
