Ozone Day on 16th September 2021

International Day for the Preservation of the Ozone Layer

September 16th was designated by the United Nations General Assembly as the International Day for the Preservation of the Ozone Layer. This designation had been made on December 19, 2000, in commemoration of the date, in 1987, on which nations signed the Montreal Protocol on Substances that Deplete the Ozone Layer. In 1994, the UN General Assembly proclaimed 16 September the International Day for the Preservation of the Ozone Layer, commemorating the date of the signing, in 1987, of the Montreal Protocol on Substances that Deplete the Ozone Layer. The closure of the hole in the ozone layer was observed 30 years after the protocol was signed. Due to the nature of the gases responsible for ozone depletion their chemical effects are expected to continue for between 50 and 100 years.

Ozone hole over Southern Hemisphere in 2001

NSS cell, Madanapalle Institute of Technology & Science in association with department of Chemistry has celebrated Ozone Day on 16th September 2021 at 11 AM in Seminar Hall-B. 50 volunteers and staff were participated in the above event.
