Report on:

WORLD MARITIME DAY

World Maritime Day was celebrated on September 28, 2024, at MITS Engineering College. The event was organized by MITS NCC to promote the theme "Navigating the Future: Safety First." This year's focus was on enhancing maritime safety and security, especially in light of rapid technological advancements and the shift towards greener energy.

50th Anniversary of SOLAS: The International Convention for the Safety of Life at Sea (SOLAS) marked its 50th year. This treaty is crucial for setting international safety standards for ships.

WMO-IMO Symposium on Extreme Maritime Weather: Held from September 23-26, this event focused on bridging the knowledge gap towards safer shipping.

Lighting up Landmarks: Various landmarks, including the IMO Headquarters, were illuminated in blue to promote the theme.
