S.No	Name of the Instrument/ Equipment	Number	Instrument/Equipment
1	Stewart and Gees Apparatus	15	 A photograph of the Stewart and Gees apparatus. It consists of a white rectangular power supply unit with several red and blue terminals on the front. To its right is a metal frame with a horizontal bar and a vertical ring. A small circular component is connected to the power supply by wires. The setup is on a reddish-brown tiled surface against a light green wall with a power outlet.

2	Meldes's Apparatus	12	 A photograph of Melde's apparatus. It features a black metal stand with a horizontal bar. A string is stretched across the bar, and a weight is attached to it. A power supply unit labeled 'BATTERY GENERATOR' and 'TEXLA' is connected to the setup. A ruler is visible in the foreground for scale. The apparatus is on a wooden table.
