

In the academic year 2021-2022, the MCA department introduced various innovative practices to elevate student engagement and learning outcomes. Key initiatives include learning management system, project-based learning, just a minute, student staging presentation and group activity. These efforts were aimed at fostering practical knowledge, enhancing collaboration, and aligning with industry expectations. These innovations enriched the teaching-learning ecosystem, preparing students for both academic excellence and the dynamic demands of the professional world.

Innovative Teaching Learning Process (2021 – 2022)
