In the academic year 2022-2023, the MCA department implemented several innovative practices to enhance student engagement and improve learning outcomes. These initiatives focused on fostering practical knowledge, collaboration, and industry readiness. Key initiatives include learning management system, project-based learning, just a minute, student staging presentation and group activity. These innovations have significantly enriched the teaching-learning process, preparing students for academic success and equipping them with the skills required for professional challenges.

Innovative Teaching Learning Process (2022 – 2023)
