Notes Regarding Department and Symposium

The HOD/CST, Dr. M. Sreedevi, gave a note afterward in which she said, "We have a caption like igniting the tech minds so we are all technical people so again we are making the caption as igniting." Every day we have to ignite to learn new things, and this symposium is one of the platforms where we can learn something in addition to whatever knowledge we already possess. There are many Technical events as well as Non-Technical events to enjoy the day and learn as well. She asked everyone to participate, saying that by doing so you can learn as well as by being an audience member. At last, she expressed her hopes to everyone to have a great day.

Later, **Dr. Goutham Chakraborty, Dean/School of Computers**, expressed her joy at the symposium's opening and gave the definition of a symposium as follows: a limited group of people create and discuss a topic of their interest. This suggests that the student community today organizes a one-day technical symposium to discuss a topic of interest, which they organize as Technical and Non-Technical. This is because, in my opinion, students are very interested in both technical and non-technical applications of knowledge. Today, however, you see the department of computer science and technology because, as everyone knows, computer science is seeing rapid developments.

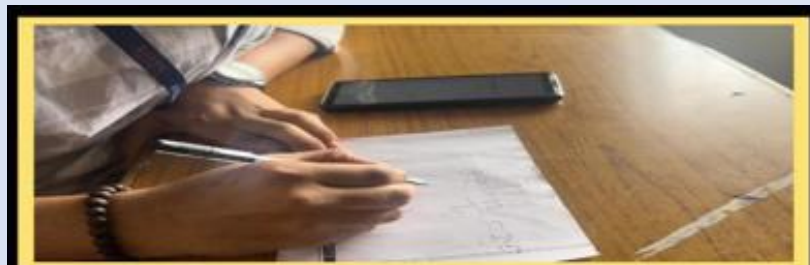

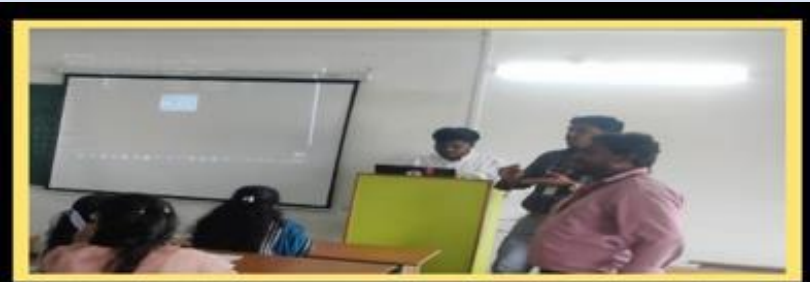

ADDRESS OF THE CHIEF GUEST & CD LAUNCH

Our dear is the chief guest at the National Level Technical Symposium.

Dr.C.Yuvaraj, Principal/MITS, He thanked the CST department's event organizers as a way to show his satisfaction. He went on to say that everyone was having a nice morning and that the symposium was just going to fill in some gaps for the student community. He shared his thoughts on this, saying that one of the biggest barriers facing the student community in this generation is the shyness that many students have these days when it comes to coming to present themselves in front of others. For this reason, he suggested that students should participate as much as possible in all of the events because that is the first step toward success in life.
