About Speaker:

Mr. Rajeshwar Reddy is a distinguished Master Degree Alumni of MITS, After his master degree, Rajeshwar Reddy joined as Techie in HCL Technologies, Bangalore. Since that, He is working in HCL, last year he is promoted to Senior Firmware Developer.

About the Guest Lecture:

Mr. Rajeshwar Reddy, our distinguished alumni, addressed our student about how to achieve goal without getting diverted in the student life. Success will come out of proper time management. In fact Time management is necessary from the childhood to the old age. Most of the common man in our country is looking for money as a primary source of income and investment. But the truth is Time is more valuable than the money. The people who are managing their time properly, they are the one who is becoming the success person in this business world. Olden days, we have a quote says that Money make many things, but the reality in the current scenario is “Money makes everything”. Time is a Investment, If you invest in a proper place, you can expect a great return. If you invest in a junk place, you will lose everything. Time is God. Success will be obtained with consistency and persistency in the work. Theoretical knowledge will not help you to get a good job or to start a business. Practical knowledge and the hard work will give you good job or to understand the ground reality of the business. HCL has a different strategy to recruit people; similarly, all the companies have their own recruitment process. As a fresher, you should understand the individual company HR recruitment policy. This will give you confident about the interview process. Similarly, every company makes their own product with their own design and manufacturing process. Understand their policies are very important to be a successful player in the organization.

All the students are in the right time of the globalization process. Industry 4.0 is gaining more and more attention towards all the top companies in the technology. As a ECE students, IoT doesn't exist without Electronics and computer Science. IoT has a market of 3 trillion dollar business in next 3 years around the globe. IoT promising a great job opportunity for Hardware Engineers, Network engineers, Software Engineers and Data Scientist. You all are requested to focus more in Industry 4.0 for the better future.

After the Guest Lecture Alumni Interaction Session, Students were able to understand the reality of the Job market. And they understood how much the time is more important in the human life. Wasting time is like wasting the soul and heart. In the last, our speaker gave fundamentals about the master degree. How to pursue the master degree and what are the job opportunities after the master degree. With this our guest has finalized his talk and the student and Guest Interaction begins.
