

Blended Learning

WHAT IS IT?

Blended learning is a model that combines the effectiveness and socialisation opportunities of the classroom, with the technology-enhanced active learning possibilities of the online environment (Dziuban, Hartman, & Moskal, 2004). The balance between face-to-face elements and online activities varies depending on the purpose and outcomes to be achieved, and is guided by pedagogical design principles (Partridge, Ponting, & McCay, 2011)..
