6.3 Water usage and care

Metric	Parameter
6.3.1	Waste Water Treatment

MITS- MATERIAL AND QUALITY TESTING LABORATORY

DEPARTMENT OF CIVIL ENGINEERING

TEST REPORT

TR No: MITS-MQTL/TR/23/10/152
TR Date: 06/10/2023

1.	Name and address of the customer	Site office, MITS - Madanapalle,
2.	Job card no	MITS –MQTL/2023/09/152
3.	Sampling method & Date of sampling	NA
4.	Material identification	Ro Water
5.	Date of sample receipt	21/09/2023
6.	Date of sample testing	24/09/2023
7.	Location & Test done by	MITS – MQTL , Mrs Lipsa M and Veeresh B
8.	Method of test (IS code)	Water portability assessment as per IS 10500:2012
9.	Condition of sample when received	Good
10.	Environmental conditions :	
	a. Room temperature :	27 ^{0}Celsius
	b. Relative humidity :	73 %

Name of the test: Water portability assessment as per IS 10500:2012

S. No	Description	Unit	Limit	Result			
				WB	EB	SB	Canteen
1.	pH		6.5-8.5	6.8	6.7	6.5	6.6
2.	Total Dissolved Salts (TDS)	mg/L	500	30	34	31	32
3.	Total Suspended solids (TSS)	mg/L	500	NIL	NIL	NIL	NIL
4.	Biological Oxygen Demand (BOD)	mg/L	2	3.8	3.4	3.3	3.5
5.	Chemical Oxygen Demand (COD)	mg/L	<250	11	13	10	12
6.	Turbidity (NTU)	NTU	1	NIL	NIL	NIL	NIL
7.	Total Hardness	mg/L	200	80	85	84	82

(Note: - Reported value approximately at 95% confidence level with coverage factor k = 2)

~~~~~~~~~~~~~~~~~~~~~~~~~~ End of test report ~~~~~~~~~~~~~~~~~~~~~~~~~~

Note:

1. WB: west block; EB: East Block; SB: South Block
2. This report can neither be used as an evidence in the court of law, nor it can be produced in part or full in any media without prior permission.
3. The result listed refer only to the tested sample and applicable parameters.
4. Perishable samples are destroyed after testing; requested samples are returned back to the customer.
5. Sample(s) not drawn by us, unless otherwise mentioned.

Certificate on availability of Potable Water Supply in M.I.TS

This is to certify that the water from Four Bore wells that are bearing used in the premises of Madanapalle Institute of Technology & Science, Madanapalle, Annamayya District, Andhra Pradesh is potable and Fit for drinking useful for drinking purpose.

DETAILS OF VARIOUS FACILITIES:-

- Sewage Treatment Plant
- Water Harvesting Pits
- RO Facility
- Waste Management

SEWAGE TREATMENT PLANT:-

*Sewage treatment plant is a facility that removes contaminants from waste water to make it safe for reuse or discharge into the environment.

*STP’S are essential because they Protect the environment and Public health.

*Treated water using for garden and trees.

*20,000 to 30,000 litres per day water is being used for garden after treatment.

*Periodical services are being done.

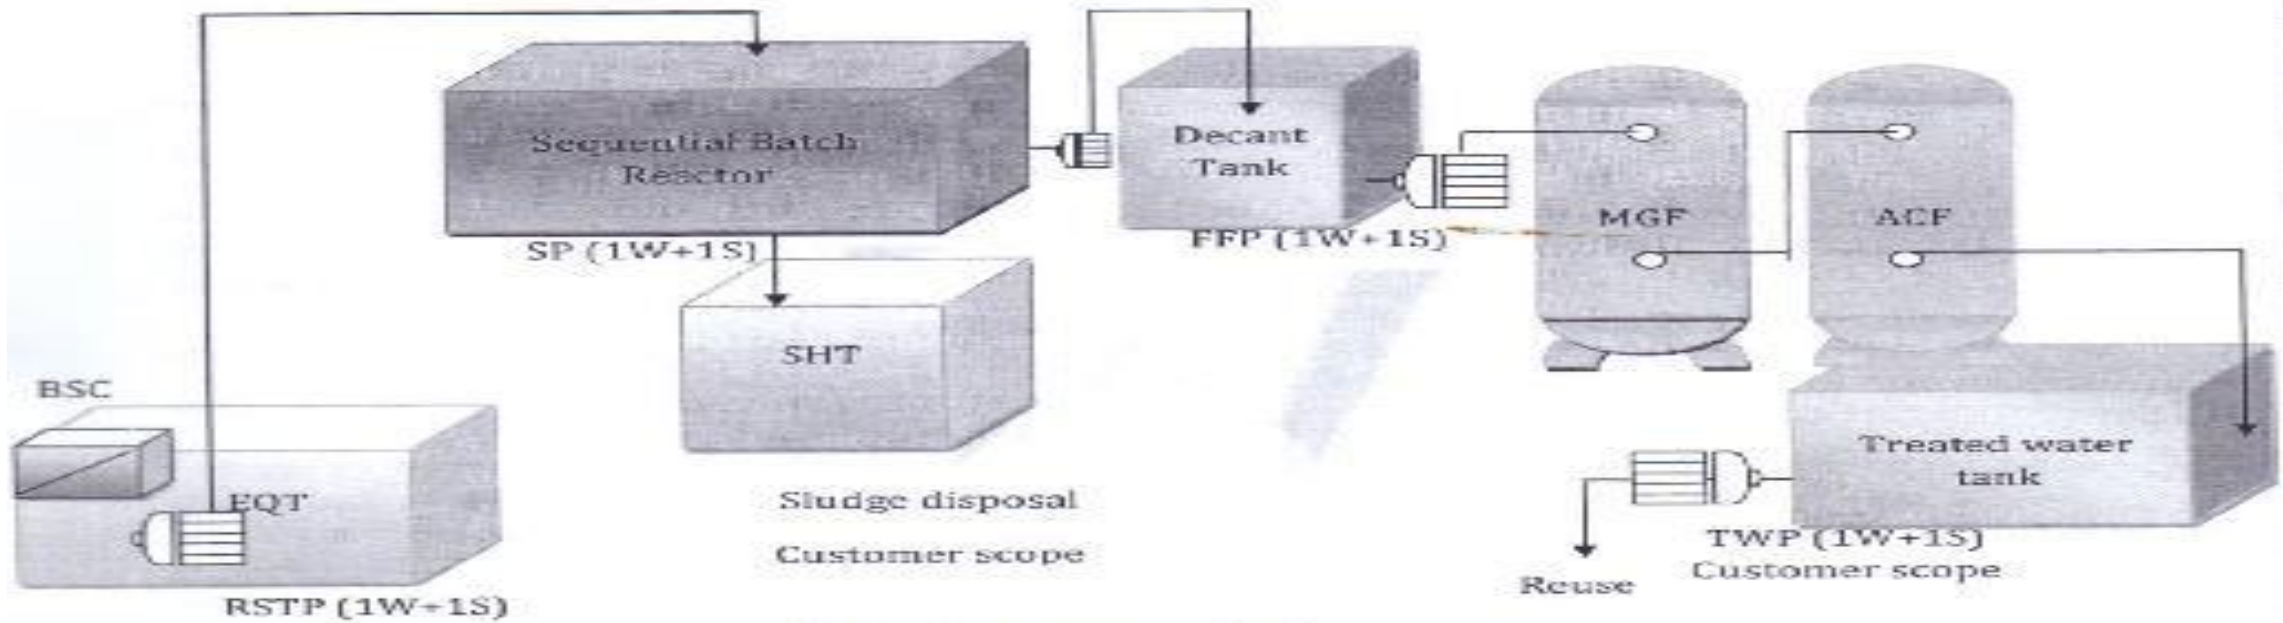
SEWAGE TREATMENT PLANT:-

SPECIFICATIONS:-

- Design Capacity :50KLD per day.
- Built up Area : 54.56 sqm
- Plant Started : 02.02.2018
- Operating Hours : 10
- Expenditure : Rs.8,09,500/-
- **Use of treated Water:**
- To treat the water for utilizes to garden.

SEWAGE TREATMENT PLANT

PROCESS FLOW BLOCK DIAGRAM



Legend:

- Civil Works

BSC	- Bar screen chamber
EQT	– Equalization tank
SBR	- Sequential Batch reactor
SHT	- Sludge Holding tank
MGF	- Multi grade sand filter
ACF	- Activated carbon filter
RSTP	- Raw sewage transfer pump
SP	- Sludge pump
FFP	- Filter feed pump
TWP	- Treated water pump

WATER HARVESTING PITS:-

*The use of Pits is made to store the water subsequently recharge to ground water through specially constructed recharge wells to avoid deflection of water table.

*There are two Rain water harvesting pits in campus with a capacity of 4 Lakh liters.

REVERSE OSMOSIS PLANT:-

*A Reverse Osmosis (RO) Plant’s purpose is to purify or desalinate water using a process that forces water through a semipermeable membrane. The Membrane separate pollutants from the water, producing ultra pure water.

* RO Plant’s are often used to purify drinking water from ground water.

*It can remove many contaminants ,including trihalomethanes,some pesticides, solvents and other volatile organic compounds.

*There are 6 no’s RO Plant in Campus.

*Periodical service of the RO Plant's are being done.

REVERSE OSMOSIS WATER DETAILS:-

LOCATION AND SPECIFICATION DETAILS

S.no	Location	Units	Specifications- LPH-Litter per hour	
1	Western Building	1	500 LPH RO System -Full Auto system	3000 Liters used per day
2	Southern Building	1	1000 LPH RO System -Full Auto system	5000 Liters used per day
3	Eastern Building	1	1000 LPH RO System -Full Auto system	5000 Liters used per day
4	Circular Building	1	150 LPH RO System -Full Auto system	2000 Liters used per day
5	Eastern Canteen	1	1000 LPH RO System -Full Auto system	5000 Liters used per day
6	Hostel	1	500 LPH RO System -Full Auto system	3000 Liters used per day
	Total	**6**		

WASTE MANGEMENT:-

*Waste management is the collection,transport,processing,recycling or disposal ,monitoring of waste material.

*There are four types of waste management:-

Landfills, Recycling ,Incineration, Composting

*Approximately 5 to 6 tons of solid waste is accumulated per year in the campus.

*The beneficial use of solid waste keeps materials out of landfills and reduces amount of raw materials used in construction.

*Various steps are being taken for disposal of used papers, books and e-wastage. Whereever certificates are required and obtained.

Compost Pits
Materials use : waste leaves and Cow dung

Process of manufacturing the Natural fertilizers in MITS
Cow Dung
Water
waste leaves

SITE OFFICE:-

*Site office is established in the campus with qualified faculty members for monitoring daily various engineering activities in the campus.

*Site office is responsible for campus cleaning ,sanitation ,gardening ,plumbing,waterlines,electrical and carpentry works.

*Construction and execution of new buildings as per approved plans.

*Monitoring of various periodical service contracts of elevators,RO Plant,STP unit etc.,

*Maintenance of stocks of various items related to Construction works.
