

## Report on Awareness Program on NSP Application Process

For I B.Tech Students

An awareness program on the National Scholarship Portal (NSP) application process was conducted on 16th November 2025 at Madanapalle Institute of Technology & Science (MITS), Deemed to be University. The program was organized by the Student Affairs Cell with the objective of guiding I B.Tech students on applying for various Central Government scholarship schemes available through the NSP.

The session aimed to create awareness about the importance of scholarships in supporting students from diverse socio-economic backgrounds and to ensure that eligible students do not miss the opportunity due to lack of information or procedural difficulties.

During the program, students were briefed on:

- An overview of the National Scholarship Portal (NSP)
- Different Central Government scholarship schemes applicable to undergraduate engineering students
- Eligibility criteria, required documents, and important deadlines
- Step-by-step demonstration of the online application process
- Common mistakes to avoid while filling the application
- Post-submission process including verification and tracking of application status

The session was interactive, and students actively participated by raising queries related to Aadhaar seeding, income and caste certificates, bank account details, and institute verification. The resource persons addressed all questions and clarified doubts to ensure students had a clear understanding of the process.

The program was well received by the participants and proved to be highly beneficial. Students expressed confidence in applying for NSP scholarships independently after the session. The Student Affairs Cell reaffirmed its commitment to providing continuous guidance and support to students throughout the scholarship application and verification process.

The awareness program successfully met its objectives and contributed positively towards enhancing scholarship accessibility and student support at MITS, Deemed to be University.
