2. In advanced Datastructures & Algorithm Analysis the following few modifications were

suggested by the experts:

a. In Unit V, members suggested to remove Travelling Salesperson Decision Problem (TSP) under NP Hard Graph problems.

b. Further they suggested to add the word without proof in bracket for the Cook's Theorem.

c. Members recommended to add textbooks on Data Structures and Algorithms which are not any programming language specific.

3. Regarding Object Oriented Programming through Java course, experts were satisfied with all the topics as it is most essential for the students.

4. With respect to Advanced Data structures & Algorithm Analysis Laboratory & Object Oriented Programming through Java Laboratory, the board approved the course content.

5. In Python Programming Skill oriented course experts suggested that content is too heavy and recommended to reduce the same for the level of second year and experts recommended to allot one more additional theory hour per week for teaching the course.
