MITS Web Club First workshop for the academic year 25-26 was started at 3 PM on September 2025. The event began with a welcome address by Ms Divya student from the Department of CSE, who provided a brief overview of the event proceedings.

Dr R Nidhya, Professor/ CSE & Web club Coordinator has briefly explained importance of the club, benefits of joining in the club and she appreciated previous year Web Club coordinators V. Harshavardhan and V. Mahesh Kumar for making Web Club successful and announced the new Web Club Coordinators V Dinesh Kumar & Ms. Divya who will be planning the further activities. The SAC (Student Activity Center) Coordinator Dr. G. Hemantha Assistant Professor/ECE shared her thoughts on importance of clubs and encouraged students to join different types of clubs for their well-being. Previous year Club Student Coordinators are appreciated by providing the certificate by the dignitaries on the dais.

Followed by hosted the workshop on "Introduction to Development Environment" on October 28, 2024, which centered around the fundamentals of Development Environments. Throughout the workshop, WEB CLUB members demonstrated how to install the widely-used Integrated Development Environment (IDE), Visual Studio Code (VS Code). A comprehensive examination of the platform's various features and settings was conducted, showcasing its versatility and user-friendly interface. Additionally, participants received guidance on essential extensions that enhance the functionality of VS Code, enabling them to maximize the IDE's

capabilities for their development projects. Practical tips were shared on how to customize the workspace, troubleshoot common issues, and increase productivity during coding sessions. The workshop aimed to equip participants with the knowledge and tools required to efficiently utilize VS Code, leading to a more creative and productive coding experience.

The interactive nature of the session, combined with live demonstrations and practice exercises, ensured that participants gained practical exposure. By the end of the workshop, students were able to confidently use VS Code, Git, and GitHub in their academic and project work, preparing them for future professional development environments.

Outcome of the Event:

- Students gained hands-on experience in using Visual Studio Code effectively for coding, debugging, and project management.
- Participants developed a clear understanding of Git commands and version control practices, enabling them to track and manage code efficiently.
- Students successfully created and managed repositories on GitHub, learning how to collaborate and contribute to shared projects.
- The workshop enhanced participants' confidence in applying industry-standard tools for academic projects and future professional work.
- The session encouraged teamwork, problem-solving, and best practices in software development.

Workshop on "Developer Journey Essentials: VS Code, Git, GitHub".

Venue: Seminar Hall-B

Time: 3PM-5PM

Report Received on: 11/10/2025

Mode of Conduct: Offline

Attendees Count: 99

Objectives:

- **Objective 1**

Tool Mastery: Successfully set up the HTML boilerplate and utilize the VS Code Live Server for efficient coding.

- **Objective 2**

Text Structure: Implement heading, paragraph, and list tags (ul, ol, dl) to correctly organize text content.

- **Objective 3**

Media Integration: Embed images and videos and create functional navigation using the anchor tag (<a>).

- **Objective 4**

Content Grouping: Differentiate and correctly apply div (block) and span (inline) for structural content separation.

Workshop Overview:

The “Build the Web: HTML & CSS Basics-1” workshop, organized by the **MITS WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, is scheduled for **Saturday, October 11, 2025**, from **3:00 PM to 5:00 PM** in **Seminar Hall-B**. This foundational session aims to introduce participants to the basics of **HTML and CSS**, the core technologies for Web development.

The workshop began with environmental setup, including the use of the VS Code Live Server extension and generating the standard HTML boilerplate. The core content covered the crucial tags for structuring content, such as heading tags (`<h1>` to `<h6>`) and the paragraph tag (`<p>`), alongside organizing data using Unordered list (`<ul>`), Ordered list (`<ol>`), and Definition (`<dl>`) lists. Practical application extended to embedding images and videos, creating navigation using the anchor tag (`<a>`), and structuring tabular data with table row, heading, and data tags. Finally, the session concluded by differentiating the roles of the versatile container elements, `<div>` (block-level) and `<span>` (inline), which are fundamental for applying styles via CSS.

Outcome of the Event:

- BL1

Knowledge: Recall basic HTML tag purposes (headings, paragraphs, anchors, table elements).

- BL2

Comprehension: Explain when to use different list types (ul, ol, dl) and the roles of div vs span.

- BL3

Application: Construct a document using the boilerplate and the VS Code Live Server; successfully embed images and videos.

- BL4

Analysis: Differentiate the structural roles of various tags and analyze how div/span are used for content grouping.

- BL5

Synthesis (Creating): Students can design and produce a simple, multi-element webpage (with links, lists, and embedded media) by integrating all learned HTML tags and using a structured workflow.

Conclusion:

The workshop concluded successfully, providing students with a strong foundational understanding of HTML structure and essential tag usage. Participants are now able to initiate a project using the boilerplate and VS

Code Live Server, implement core elements like headings, lists, and tables, and integrate images and videos. Critically, the session established the correct application of the `<div>` and `<span>` containers, effectively preparing students to logically group their content for the subsequent introduction and application of CSS styling.

Workshop Overview:

The “Build the Web: HTML & CSS Basics-2” workshop, organized by the **MIT WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, is scheduled for **Wednesday, October 15, 2025**, from **3:00 PM to 5:00 PM** in **Seminar Hall-A**. This foundational session aims to introduce participants to the basics of **HTML and CSS**, the core technologies for Web development.

In the today's workshop, we explored fundamental HTML and CSS concepts essential for creating and styling web pages. The session covered HTML forms, various input types, labels, and buttons to understand how user data is collected effectively. On the CSS side, participants learned about selectors such as class, ID, and universal, and experimented with background colors using RGB, RGBA, HSL, and HSLA values. The box model was explained in detail, focusing on padding, borders, and margins to manage spacing. We also introduced flexbox, demonstrating the use of display flex, justify-content, and align-items for creating responsive layouts. Finally, the session concluded with text decoration techniques, showing different styles like underline, overline, and line-through to enhance typography.

Outcome of the Event:

- Participants understood the structure and functionality of HTML forms and input elements.
- Attendees gained hands-on experience with CSS selectors and styling techniques.
- Learners were able to apply modern color models and background customization in web design.
- Everyone practiced creating responsive layouts using the box model and flexbox properties.
- The workshop improved skills in text decoration and formatting for enhanced webpage readability.

Conclusion:

The "Build the Web: HTML & CSS Basics - 2" workshop successfully equipped participants with practical knowledge of foundational web development concepts, focusing on both HTML structure and CSS styling techniques. Through interactive sessions, attendees not only learned theoretical aspects but also gained valuable hands-on experience, enabling them to confidently design and style responsive web pages. This event fostered greater enthusiasm for web development and empowered students to continue their journey in creating impactful digital experiences.

Venue: Seminar Hall-B

Time: 3PM-5PM

Report Received on: 29/10/2025

Mode of Conduct: Offline

Attendees Count: 47

Objectives:

- **Objective 1**

To provide an initial understanding of the JavaScript programming language.

- **Objective 2**

To teach participants how to interact with and modify the Document Object Model (DOM).

- **Objective 3**

Master the use of event listeners to make web pages interactive.

- **Objective 4**

Apply both JS and DOM knowledge to build web pages that change and respond to user actions.

Workshop Overview:

The “**Decode the Web: Learn JavaScript**” workshop, organized by the **MITS WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, is scheduled for **Wednesday, October 29, 2025**, from **3:00 PM to 5:00 PM** in **Seminar Hall-B**. This foundational session aims to introduce participants to the fundamentals of JavaScript (JS) and Document Object Model (DOM), the core technologies for Web development.

In the today's workshop, we explored fundamentals of JS and DOM concepts. The primary objective is to equip participants with the skills to make web pages dynamic and interactive by teaching the core concepts of the JavaScript (JS) programming language. A major focus will be on the Document Object Model (DOM), which is the programming interface for HTML and XML documents. Attendees will learn how to use JS to select, modify, and manipulate the content, style, and structure of a web page in response to user actions, such as clicks or key presses, thereby transforming static HTML into a rich user experience.

Outcome of the Event:

The "Decode the Web: Learn JavaScript" workshop, organized by the MITS Web Club under the Student Activity Center at Madanapalle Institute of Technology & Science, successfully introduced participants to essential JavaScript concepts and the Document Object Model (DOM)[1]. Held on

October 29, 2025, in Seminar Hall-B, the session empowered attendees to understand core web technologies that drive interactive websites. Guided by faculty, student coordinators, and technical experts, the workshop fostered a collaborative and engaging environment. As a result, participants are left equipped with foundational JavaScript skills and a clearer sense of how to advance their web development journey.

Attendees Count: 64

Objectives:

- **Objective 1**

Enable participants to structure the content of a webpage using fundamental text elements (e.g., <h1>-<h6>, <p>,
).

- **Objective 2**

Equip attendees with the skills to embed media and links (e.g., `<img>`, `<video>`, `<a>`) for a richer, navigable web experience.

- **Objective 3**

Train participants to organize content effectively using semantic and grouping tags (`<ul>`, `<ol>`, `<table>`, `<div>`, `<span>`).

- **Objective 4**

Provide hands-on knowledge to design basic interactive forms (`<form>`, `<label>`, `<input>`) for data collection on a webpage.

Workshop Overview:

The “**HTML Essentials: Structuring the Modern Web**” workshop, organized by the **MITS WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, is scheduled for **Wednesday, November 5th, 2025, from 3:00 PM to 5:00 PM in Seminar Hall-C**. This is an intensive session designed for first-year students to master the core building blocks of modern web pages. It covers essential HTML elements, from structuring text and embedding media to organizing content using lists and tables, and creating basic interactive forms. The goal is to provide a foundational understanding of HTML to confidently start web development.

The session kicks off with an Introduction to VS Code to establish a productive coding environment. Participants will then delve into essential structural tags, learning how to manage text hierarchy using `<h1>`-`<h6>` and

<p>, insert line breaks with
, and enhance content with media like and <video>. The workshop also covers crucial navigation and organization elements, including creating links with the Anchor tag (<a>), structuring data using Ordered and Unordered Lists, and formatting tabular information with the <table> tag. Furthermore, attendees will gain practical skills in building interactive interfaces using the <form>, <label>, and various input types, while mastering layout control with the grouping tags <div> and . Finally, the legacy marquee tag will be introduced for context.

Outcome of the Event:

Upon successful completion of the "HTML Essentials: Structuring the Modern Web" workshop, participants will have gained the practical ability to build the fundamental framework of a web page. This involves mastering the use of VS Code as a development tool, effectively using structural tags (`<h1>`-`<h6>`, `<p>`) to organize text, integrating media and navigation with the `<img>`, `<video>`, and `<a>` tags, and presenting organized data using lists and the `<table>` tag. Furthermore, attendees will know how to create basic interactive forms using `<label>` and different input types, and control page layout using the grouping elements `<div>` and `<span>`, thereby acquiring the essential HTML skills necessary to progress to web styling and development.

P. Bhavani Prakash III ECE-A

A. Chaitragna III CSE-A

K. Deepika III CSE-A

A. Divya Teja III CSE-A

K. Navya Sree III CSE-A

Venue: Seminar Hall-C

Time: 4PM-5PM

Report Received on: 07/11/2025

Mode of Conduct: Offline

Attendees Count: 18

Objectives:

- **Objective 1**

Understand the components of the CSS Box Model

Learn how content, padding, border, and margin together determine how elements are sized and spaced on a webpage.

- **Objective 2**

Apply box model properties to structure page layouts

Use padding, margins, and borders effectively to control spacing and Alignment of elements.

- **Objective 3**

Differentiate between box-sizing: content-box and box-sizing: border-box. Understand how these modes affect the total width and height of HTML elements.

- **Objective 4**

Debug layout issues using Box Model concepts

Identify and fix common spacing or overflow problems by analyzing the box model in browser developer tools.

Workshop Overview:

The **“CSS Essentials: Styling for the Digital Era-1”** workshop, organized by the **MITS WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, is scheduled for **Friday, November 7th, 2025**, from **4:00 PM to 5:00 PM** in **Seminar Hall-C**. This is an intensive session designed for first-year students to give the foundational concepts of Cascading Style Sheets (CSS), enabling them to create visually appealing and well-structured web pages. Organized by the MITS Web Club under the Student Activity Center, the workshop focuses on practical, hands-on learning to help students understand how CSS enhances the presentation of HTML content.

Participants will explore essential styling techniques, the CSS box model, layout mechanisms, typography, color theory, and modern best practices used in front-end development. Through guided demonstrations and interactive exercises, students will develop the ability to style web pages effectively and gain confidence in customizing user interfaces. This workshop aims to build a strong foundation for future web development projects and encourage design-oriented thinking among budding developers.

Outcome of the Event:

Upon successful completion of the “CSS Essentials: Styling for the Digital Era” workshop, participants will gain a strong foundation in CSS styling, helping them understand essential concepts such as selectors, the box model, and layout techniques. Through hands-on practice, students learned to design visually structured web pages and apply modern styling approaches effectively. By the end of the session, attendees felt more confident in creating

and customizing user interfaces, preparing them for future web development projects, and advanced learning in front-end technologies.

Mode of Conduct: Offline

Attendees Count: 10

Objectives:

- **Objective 1**

Understand and apply Flexbox to create flexible and responsive layouts.

- **Objective 2**

Use align-items to properly align content within flex containers.

- **Objective 3**

Implement borders to define and style element boundaries.

- **Objective 4**

Apply box-shadow to add depth and visual enhancement to UI elements.

Workshop Overview:

The “**CSS Essentials: Styling for the Digital Era-2**” workshop, organized by the **MITS WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, is scheduled for **Tuesday, November 18th, 2025, from 4:00 PM to 5:00 PM in Lab –02 (Shiva Block)**. This workshop is designed to help participants understand and apply essential CSS layout and styling techniques used in modern web development. Through practical examples and hands-on exercises, learners will gain confidence in creating responsive, well-structured, and visually appealing web pages.

The session covers Flexbox for building flexible layouts, including the use of align-items to control alignment along the cross-axis. Participants will also explore the CSS box model, focusing on borders and how they define element boundaries. Additionally, the workshop introduces box-shadow to enhance UI design by adding depth and visual emphasis to elements.

Outcome of the Event:

Upon successful completion of the “CSS Essentials: Styling for the Digital Era” workshop, participants will be able to design structured and visually appealing web layouts using Flexbox, effectively align elements with align-items, and enhance user interfaces using borders and box-shadow. Participants will gain practical skills that can be immediately applied to real-world web design and front-end development projects.

Report Received on: 29/12/2025

Mode of Conduct: Offline

Attendees Count: 21

Objectives:

- **Objective 1**

Skill Development: To encourage students to master modern design tools like Figma, Canva, and Pixlr.

- **Objective 2**

Creative Execution: To provide a platform for designing a creative and user-friendly interface for the ASHV2K26 website.

- **Objective 3**

Industry Readiness: To bridge the gap between academic theory and professional UI/UX design standards.

- **Objective 4**

Competitive Spirit: To identify and showcase the top web designing talent within the MITS student community.

Workshop Overview:

The Web Designing Showdown, organized by the **MITS Web Club** under the **Student Activity Center (SAC)**, was a high-energy creative competition held on **December 29th, 2025, at Seminar Hall – A**. The event challenged students to showcase their technical proficiency and artistic vision by designing a website for ASHV2K26, the institute's upcoming flagship event. Participants utilized industry-leading tools such as Figma, Canva, and Pixlr to build user-friendly interfaces, focusing on modern UI/UX principles, layout optimization, and thematic consistency. By providing a professional environment for students to compete and innovate, the showdown successfully highlighted the design talent within the institution and prepared students for real-world digital branding challenges.

Outcome of the Event:

The event successfully empowered participants to translate abstract concepts into tangible digital assets, resulting in a diverse portfolio of website prototypes for **ASHV2K26**. Students demonstrated significant growth in their ability to handle UI/UX constraints, specifically in balancing visual flair with ease of navigation. Beyond technical skill acquisition, the competition fostered a collaborative atmosphere where participants could benchmark their skills against their peers, gaining valuable insights into modern design trends and industry workflows. Ultimately, the showdown identified a core group of talented designers capable of contributing to the institute's official digital platforms, while reinforcing the role of the **MITS Web Club** as a hub for technical innovation and creative excellence.

Conclusion:

The Web Designing Showdown served as a successful bridge between creative imagination and technical execution. By focusing on the **ASHV2K26** theme, the event provided students with a practical, goal-oriented challenge that went beyond classroom learning. The high level of engagement and the quality of the designs produced demonstrate that students are well-equipped to handle modern web design demands using industry-standard tools. Overall, the event achieved its goal of nurturing a design-first mindset, leaving participants better prepared for future professional opportunities in the digital and tech landscape.

Venue: SB-108

Time: 10:00 AM – 4:00 PM

Report Received on:

Mode of Conduct: Offline

Attendees Count: 64

Objectives:

- **Objective 1**

To introduce participants to modern web development concepts and technologies.

- **Objective 2**

To provide knowledge of both frontend and backend tools such as HTML, CSS, JavaScript, Node.js, and MongoDB.

- **Objective 3**

To help students understand how to build dynamic and responsive web applications.

- **Objective 4**

To encourage participants to explore full-stack development and enhance their practical coding skills.

Workshop Overview:

The “**DevX Web Diaries: Building Modern Web Experiences**” workshop, organized by the **MITS WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, this Workshop is conducted as part of the two-day national level techno-cultural-sports fest for **ASHV 2K26** is scheduled for **25th & 26th March**, from **10:00 AM to 4:00 PM** in **SB-108**. This workshop focused on introducing participants to modern

web development practices and technologies. The session covered essential tools and frameworks such as HTML, CSS, JavaScript, Node.js, and MongoDB, helping students understand how modern web applications are designed and developed. It provided both conceptual knowledge and practical insights into building dynamic and responsive web experiences.

Outcome of the Event:

The workshop enabled participants to gain a clear understanding of modern web development technologies and their real-world applications. Students learned how different components of web development, including frontend and backend technologies, work together to create complete web applications. The session enhanced their technical skills and provided exposure to tools like Node.js and MongoDB. It also improved their confidence in developing modern web solutions and motivated them to explore full-stack development further.

Conclusion:

The “DevX Web Diaries” session under ASHV 2K26 was informative and beneficial, offering valuable insights into modern web development practices. It successfully bridged the gap between theoretical knowledge and practical implementation, helping students build a strong foundation in both frontend and backend technologies. Overall, the workshop inspired participants to advance their skills and pursue further learning in full-stack web development.

Venue: KK Block-002

Time: 10:00 AM – 4:00 PM

Report Received on: 01/04/2026

Mode of Conduct: Offline

Attendees Count: 114

Objectives:

- **Objective 1**

To help students understand the fundamentals of modern web development

- **Objective 2**

To provide practical exposure to designing and developing websites.

- **Objective 3**

To enhance frontend development skills using core technologies.

- **Objective 4**

To encourage students to build creative and responsive web applications.

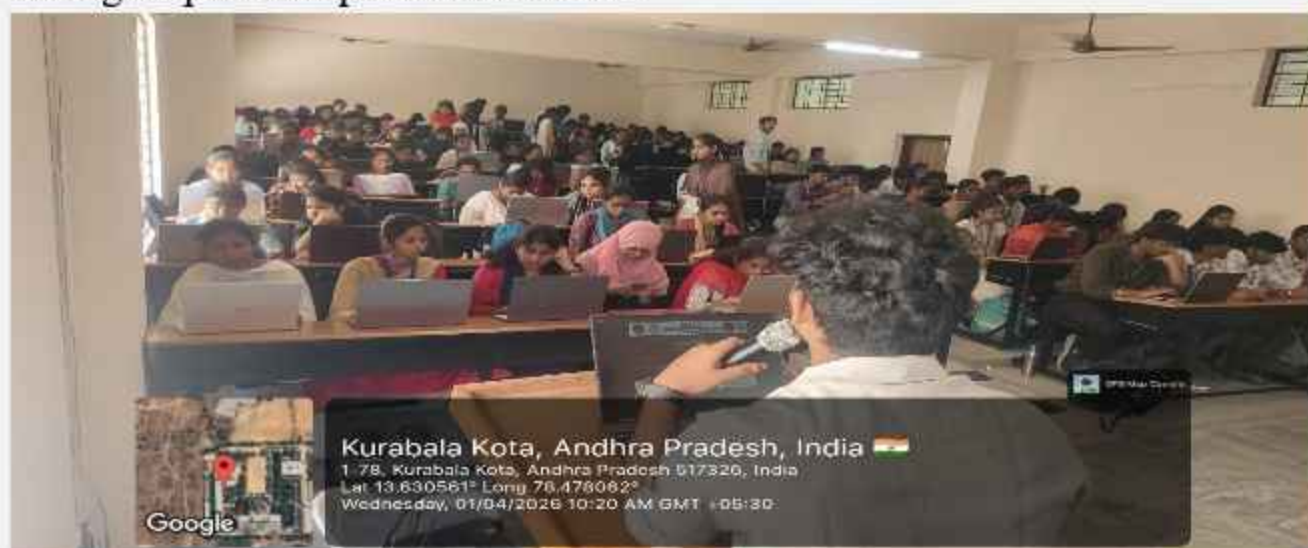

Workshop Overview:

The “**GMOCS-2K26**” workshop, organized by the **MITS WEB CLUB** under the Student Activity Centre (SAC) of Madanapalle Institute of Technology & Science, is scheduled for **Wednesday, April 1st, 2026**, from **10:00 AM to 4:00 PM** in **KK Block 002**. This is an intensive session designed to introduce students to the fundamentals of modern web development. The session focused on core technologies such as HTML, CSS, and JavaScript, enabling participants to understand the structure, styling, and interactivity of web pages. The workshop combined theoretical explanations with hands-on practice, allowing students to design and develop simple, interactive websites. It served as a valuable platform for beginners to gain practical exposure and enhance their frontend development skills.

In this session, participants learned how to prepare a personal portfolio using **Visual Studio Code (VS Code)**. The session focused on creating a basic portfolio website that showcases personal details, skills, projects, and contact information. Students were guided step-by-step on how to structure the portfolio using HTML, style it using CSS, and enhance it with simple JavaScript features. They also gained hands-on experience in using VS Code for writing, editing, and organizing code efficiently. This practical session helped participants understand how to present their work professionally through a personal portfolio website.

Outcome of the Event:

The workshop proved to be highly beneficial for the participants as it strengthened their understanding of fundamental web development concepts. By the end of the session, students were able to create simple web pages using HTML, apply styling with CSS, and add basic interactivity using JavaScript. Additionally, they gained hands-on experience in developing a personal portfolio using Visual Studio Code, which helped them understand how to professionally showcase their skills, projects, and personal information. The workshop enhanced their problem-solving abilities, improved their coding confidence, and motivated them to explore advanced web development technologies in the future.

Conclusion:

The Web Development Workshop under GMOCS–2K26 was informative and beneficial, providing essential knowledge of HTML, CSS, and JavaScript along with practical exposure to portfolio development using Visual Studio Code. The session enhanced students' technical skills and confidence and laid a strong foundation for further learning in web development.
