MADANAPALLE INSTITUTE OF TECHNOLOGY & SCIENCE
Affiliated to JNTUA, Ananthapuramu & Approved by AICTE, New Delhi
(UGC-AUTONOMOUS INSTITUTION)
NAAC Accredited with A+ Grade, NIRF India Rankings 2024 - Band: 201-300 (Engg.)
NBA Accredited - B.Tech. (CIVIL, CSE, ECE, EEE, MECH, CST), MBA & MCA

IQAC

Form No: IQAC/25-26/19

STAKEHOLDER FEEDBACK- ACTION TAKEN REPORT ACADEMIC YEAR 2025-26
DEPARTMENT OF COMPUTER SCIENCE AND TECHNOLOGY

S.No	Feedback	Action Taken	Outcomes / Achievements
1	Faculty suggested that more practical activities and updated curriculum topics should be added to improve industry relevance.	As per the curriculum structure, the IAAB and BOS members suggested the incorporation of industry-relevant courses, and syllabus revision was initiated accordingly.	Curriculum improved with practical and industry-aligned topics.
2	Faculty observed that a modern research lab is needed to support advanced learning and research activities.	The Institution provided 4 high-end HP Z2 Tower G9 workstations (Intel® Core™ i7-14700 @ 2.10 GHz, 32 GB RAM, 64-bit OS, Windows 11 Pro) exclusively for AI, Data Science and R&D activities.	Faculty members are already using these systems and actively working on research and development (R&D) activities.
3	Students mentioned that the communication gap between teachers and students should be reduced.	A monthly mentoring activity was implemented for all faculty; placement-related CodeTantra forms are processed by mentors.	Communication improved and students receive consistent academic and placement guidance.
4	Students suggested that more interactive and activity-based teaching methods should be implemented.	Faculty adopted lab-based learning, role-based activities, and real-time demonstrations; department also organized hackathons, guest lectures and workshops.	Classroom participation increased and student engagement improved.
5	Alumni recommended syllabus updates and Traning to match modern industry technologies (React, Node.js) employers suggested stronger hands-on experience.	The department arranged special training programs in Full Stack Development, CCNA, ServiceNow and other industry-relevant tools to enhance practical and job-oriented skills.	12 students secured placements through CCNA training and 2 students secured placements through Full Stack training, demonstrating improved employability and industry readiness.
6	Parents stated that students need to improve their coding skills and require better code explanations.	Monthly CodeTantra tests, learning sessions, and internal training were conducted.	74 students have been placed till now in different streams due to improved coding competency, indicating an increased placement count compared to the previous academic year.
7	Parents suggested that lab records and observation writing should be removed as they add little practical value.	Continuous evaluation was aligned with the day-to-day internal evolution method while retaining necessary academic documentation.	Students were able to complete day-to-day academic activities regularly, resulting in reduced burden and stress during evaluations.
8	Graduates highlighted that more industry-oriented exposure is needed for workplace readiness.	Internship opportunities were strengthened by connecting students with different organizations, and students were encouraged to participate.	Few students have already completed internships at different organizations (NITTTR and others).
9	Experts advised that the curriculum can be strengthened further to match emerging global technology trends.	AI, Cloud Computing, Cybersecurity, and Quantum Computing components in the syllabus were enhanced with advanced modules and practical exposure and GATE training was provided to students.	Students gained exposure to cutting-edge global technologies and improved industry readiness. 2 students qualified in GATE.
